

AI Usage DISCLOSURE FORM

1. Team Details

Team Name: Hackmatrix

Project / Product Name: Streaming live RAG

Organization / Institution (if any): SRM Institute of Science and Technology, Katankullathur

Submission Date: 04.10.2026

2. AI Usage Declaration

Did your team use any Artificial Intelligence (AI) in developing this project? Yes / No

Yes

3. Purpose of AI Usage (Brief Details)

Idea generation / brainstorming - Claude-Sonnet 5

Code generation or assistance - Claude-Sonnet 5

UI / UX design - v0 by Vercel

Content creation - Claude-Sonnet 5

Data analysis- does not apply

Testing / debugging - Claude-Sonnet 5

4. Feature Origin Classification (Please add/delete based on the number of the feature)

1. Feature Name - No-infrastructure local development runner

2. AI-Generated

3. Description (include AI tools/platform Used, prompt used , Output Summary, Modification) AI tool: Claude Sonnet 5. Prompt: "install everything needed and run this" (project had no Docker/RabbitMQ/Redis available). Output: a script that runs the real API + orchestrator with an

in-memory broker/session store instead of RabbitMQ/Redis, so the app runs without extra infrastructure. Modification: none — used as generated, verified working via live test queries.

1. Feature Name - Frontend UI redesign

2. Both

3. Description (include AI tools/platform Used, prompt used , Output Summary, Modification) - AI tools: v0 by Vercel (initial visual design) + Claude Sonnet 5 (implementation). Prompt to v0: a detailed design brief describing the app's screens and data; prompt to Claude: "redesign the UI, it looks boring/monotonic." Output: v0 produced a Next.js/Tailwind mockup; Claude re-implemented that visual language (palette, typography, spacing) directly into the project's existing React/CSS codebase, since v0's raw output used an incompatible stack. Modification: substantial — v0's code was not used directly, only its design as a reference; all CSS/JSX was hand-adapted to the real component structure.

1. Feature Name - Build/packaging fix (pyproject.toml)

2. AI-Generated

3. Description (include AI tools/platform Used, prompt used , Output Summary, Modification) - AI tool: Claude Sonnet 5. Found while setting up the project: a missing [project] table and missing package-discovery config meant pip install -e . failed entirely. Output: restored the config so the project installs correctly. Modification: none — a direct bug fix, verified by a clean install from a fresh extracted copy.

5. Ethical & Compliance Confirmation

AI usage complies with guidelines and policies. **Yes**

No proprietary or copyrighted data misused. **I Agree**

6. Declaration & Sign-Off

Name of Team Representative: Esai kaviya bhuvaneswari muthuvel

Role: Team Representative
